Work Experiences

HMIF UNDIP - Semarang, Indonesia

Mar 2024 - Jun 2024

Frontend Developer

- Created 3 sections of a landing page: the first and second sections with multiple routes and displaying data from the back-end, and the third section featuring a form with authentication and form validation to send data to the backend.
- Developed 5+ pages using routing techniques to navigate between them seamlessly.
- Designed and implemented 10+ base and reusable components in React for efficient and scalable development.
- Integrated an API to validate email addresses, ensuring data integrity and improving user experience.
- Implemented front-end form validation to enhance user input accuracy and improve overall user experience.
- Developed 10+ user interfaces and components using Chakra UI to create consistent and visually appealing designs.
- Styled web pages using SASS (scss) and Tailwind CSS for a more organized and maintainable CSS structure.
- Utilized Git and GitHub for version control, managing multiple branches to ensure smooth and organized development.

IGate 2024 - Semarang, Indonesia

Sep 2024 - Oct 2024

Frontend Developer

- Developed 7 pages featuring interactive animations ,custom payment animation, and front-end form validation for seamless user input
- Built and styled the project using Tailwind CSS, React.js, TypeScript, and JavaScript.
- Created Custom SVGs to enhance the website's design and improve visual aesthetics.
- Collaborated with the design and UI/UX teams to implement user-focused features and ensure design consistency.
- Utilized Git and GitHub for version control, managing branches and ensuring efficient team collaboration.
